

New Common Language Search Knowledge Panel

ncbi.nlm.nih.gov/search/

Everything you need in one place!

Whether you are searching for a specific gene, protein, transcript, or for a whole genome, you will now retrieve NCBI's best results regardless of the database in which you started your search. A knowledge panel with top results and highly related information can now be found at the head of search results pages.

We ♥ feedback

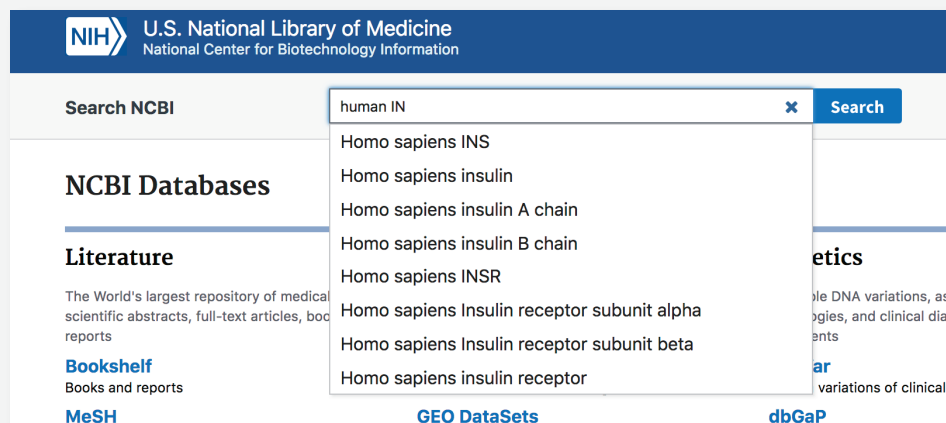

Please leave feedback using the thumb icons or contact NCBI support at info@ncbi.nlm.nih.gov.

View selected high quality transcripts.

Run a BLAST search on your result.

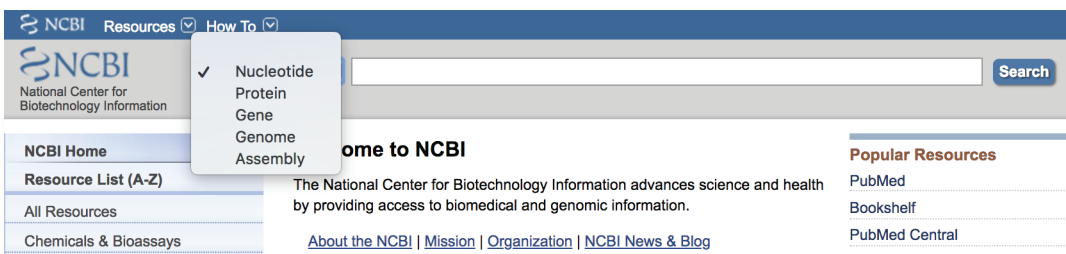

Download relevant data based on your search result.

Get search suggestions as you type!

This new search experience also includes as-you-type suggestions. Use these resource-specific suggestions that are available in select databases to avoid typos or to quickly find organisms with names that are tricky to spell. These suggestions reflect a subset of the most popular queries associated with the text you're typing that are recognized by the new search experience.

See the new panel by searching these resources from our homepage.

See examples of the new search panel and its many uses at NCBI's blog
